The disclosure is objected to because of the following informalities: The reference to the parent application listed in the priority section of page 1 should be updated to reflect its current status. Appropriate correction is required.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 2 and 5 the phrase "next preceding pulse" appears. In that the terms "next" and "preceding" in reference to a sequence of events are antonyms it is not clear what the intended meaning is. Usage of antonyms to describe a single thing is not seen to comport with the requirements of 35 U.S.C. 112, second paragraph.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

*A person shall be entitled to a patent unless –  
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.*

Claims 2 and 5 are rejected under 35 U.S.C. 102(b) as anticipated by Sydor et al. (US 4,339,722). Sydor discloses a frequency multiplier including means to accept an input (Fin), first means for determining the period of the input (counter 2; fig. 1), second means for determining each lapse of  $1/2n$  and the third means to provide the output pulse.

Claims 3, 4 and 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Sydor was not seen to disclose the excluding or exception item in claims 3 and 6 so they are not included.

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 7-17 are allowable over the prior art of record.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Steinenbach (US 5,822,229) discloses a frequency multiplier. Miyamoto et al. (US 6,601,011 B1) discloses measurement of angular velocity variation rate of a rotary axle.
